- Git

active projects

ARGallery
released 9/24/17

Create your own art exhibition, powered by ARKit! One of the coolest things I experienced at WWDC was the introduction of native AR support, and this is a fun project I created with it. Written in Swift 4 for iPhone 6s/6s+ and later.

Portfolio Website
launched 5/5/17

Homepage created for my web design final project. Hosted on GitHub Pages and accessible through the domain kylejohnsonapps.com. Built using HTML, CSS and JavaScript.

redirect
released 2/7/17

My latest iPhone game built using Swift and Firebase. Available on the iTunes App Store as a free download. Features a global leaderboard, achievements and banner ads.

awards & honors

Apple WWDC 2017 Scholarship Recipient

One of 350 winners chosen from around the world to attend Apple's 2017 Worldwide Developers Conference. To win a scholarship, I had to create a visually interactive scene within a Swift playground. Entries were judged on technical accomplishment, creativity of ideas, and content of written responses.

University Honors Program
September 2015–Present

Dean's List
Fall 2015, Fall 2016, Spring 2017

work experience

Student Web Developer
Learning and Technology Services, UWEC

March 2017–Present

I am assisting the university's web development team in creating Ruby on Rails applications for use by website administrators and faculty. Alongside the team, I am helping to create "Athena", a system of database-oriented applications independent of any content management system (e.g. CommonSpot, Drupal 8).

Tech Support Representative
ResCom Help Desk, UWEC - Eau Claire, WI

September 2015–March 2017

Cart and Range Caretaker
Island View Golf Club - Waconia, MN

June 2015–September 2016

Data Migrator
Waconia Manufacturing - Waconia, MN

June 2014–September 2014
